EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering | **CGPA – 8.42**

2022 - 2026

SKILLS

Core Languages: Python, JavaScript, SQL

Backend Development: Flask, Node.js, Express.js

Frontend Development: React, Tailwind CSS

Tools & DevOps: Git/GitHub, Docker, Google Colab

Databases: MySQL, PostgreSQL, MongoDB

INTERNSHIP

Infosys Springboard

Nov 2025 - Present

Machine Learning Intern | Remote

- Built a GRU-based predictive maintenance model to estimate Remaining Useful Life (RUL) of turbofan engines using NASA C-MAPSS time-series sensor data.
- Designed an end-to-end ML pipeline including RUL labelling, feature scaling, sliding-window sequence generation, and model training.
- Experimented with multiple sequence models (LSTM and GRU) and hyperparameter configurations to analyze performance trade-offs across datasets of varying operational complexity.

Edunet Foundation

Jan 2025 - Feb 2025

Python Machine Learning Intern | Remote

- Built an end-to-end crop recommendation system using a Random Forest model trained on soil and weather parameters (NPK, pH, rainfall, humidity, temperature).
- Developed a Flask-based web application to serve real-time ML predictions with dynamic user inputs.
- Integrated Google Gemini API to generate natural-language explanations for model predictions, improving interpretability and user trust.

PROJECTS

DataBlitz – Stock Tracking & Alert Web Application

[Link](#)

- Implemented a stock tracking web application using Next.js, integrating external market data APIs to display real-time stock prices and historical trends.
- Implemented user watchlists and threshold-based alerts, using event-driven background jobs (Inngest) and Nodemailer for automated email notifications.
- Integrated third-party charting components (TradingView) and deployed the application with environment-based configuration.
- Tech:** React, Next.js, Tailwind CSS, MongoDB, Authentication, Email Notifications

KalpChitran – Image Generator AI Web App

[Link](#)

- Built a full-stack AI image generation platform using React, Node.js, and Express, integrating FLUX.1–schnell for prompt-based image synthesis.
- Designed REST APIs for asynchronous image generation, image publishing, and retrieval with MongoDB persistence.
- Deployed the application on Render with secure environment-based configuration and Cloudinary for scalable image storage.
- Tech:** React, Tailwind CSS, Node.js, Express.js, MongoDB

CosmoSnap – NASA APOD Image Viewer

[Link](#)

- Architected a data delivery pipeline by integrating NASA's official APOD API, demonstrating a high level of proficiency in Third-Party Application Integration.
- Optimized performance by implementing browser local storage caching to reduce redundant API overhead, which advanced the overall system performance.
- Tech:** React, Tailwind CSS, NASA APOD API

ACHIEVEMENTS

- Ranked **1132 globally** in LeetCode Weekly Contest 482
- Achieved top **16%** contest rating on LeetCode

EXTRACURRICULAR

- Represented institution in inter-school chess competition, demonstrating strategic thinking and decision-making under pressure.

CERTIFICATIONS

- Oracle** Cloud Infrastructure 2025 Certified **Foundations Associate**

[\[View Certificate\]](#)
